**WARRANTIES AND CERTIFICATIONS**

 The following substances **will not** be accepted as an alternative fuel.

Biological wastes	TSCA regulated materials	Reactive cyanides	Explosives
Infectious wastes	Low Btu materials (<2500 Btu/lb)	Reactive sulfides	Incompatible Materials
Radioactive materials	PCB regulated materials (>40 ppm)	Pyrophoric materials	

The term PCB's are used in this warranty to refer to any chemical substances and combinations of substances that contain 50 ppm or greater of PCB's as defined in 40 CFR 261.3. (s), including any by-product, in a process which contains less than 50 ppm PCB's because of any dilution. It is unlawful for our facilities to receive PCB's. Any generator and transporter who knowingly or willfully ships PCB's to our facility will be subject to civil penalties and or criminal prosecution. The generator hereby warrants that the materials transferred for disposal will not contain 50 ppm or greater of PCB's when measured in each container or vessel: that the material is not contaminated with PCB's from a source containing 50 ppm or greater PCB's, and hereby agrees to indemnify and hold Lone Star Industries or Greencastle WDF Facility harmless from any costs, damages or other liability from the breach of this warranty. The sample submitted is representative of the waste stream, any significant changes to the above described waste steam will require notification and a new Waste Profile Sheet to be submitted prior to shipment. By signature below, the generator or it's duly authorized representative, hereby represents and warrants that to the best of its knowledge the information contained herein is true, accurate and complete in all respects and that all known hazards have been disclosed.
